

Extensive study: There are _____ Amish children suffering from cancer, diabetes or autism – WHY IS THAT?

English

July 9, 2023

Dhe current Amish population in America is quickly approaching 400,000, with the largest concentrations of 90,000 in Pennsylvania and 82,000 in Ohio. Amish have settled in 32 US states and have an average of 7 children per family, so the population is growing rapidly. In a brand new, extensive study (as of June 2023), presented by Steve Kirsch to the Pennsylvania State Senate, it was calculated that for Amish children, who are strictly 100 percent unvaccinated (completely unvaccinated), typical chronic conditions hardly or not at all occur, writes [Tapnewswire](#) .

These chronic conditions, also called preventable diseases and conditions, that affect almost all vaccinated children and segments

of Americans include autoimmune diseases, heart
asthma, ADHD, arthritis, cancer and of course...wait for it... autism
(think of ASD and Asperger's Syndrome).

Expert panelists testified about how healthy Amish children are compared to vaccinated American children

Maybe it's a good thing to scare people away from vaccines, for all those pro-vaccine fanatics who think every natural health advocate is a "conspiracy theorist" spreading disease and disorder by talking about dirty vaccines, vaccine injuries, and vaccine-related injuries. caused deaths. During the testimony, expert health advocates explained why reports have never been published on the health of Amish children in general, saying, "After decades of studying the Amish, there is no report because the report would be damning to the narrative. It would show that the CDC has been harming the public for decades by saying nothing and burying all the data."

COVID-19 Vaccine Regrets – Latest Personal Side Effects Reports

Dr. Peter McCullough, a top cardiologist in America, with mountains of peer-reviewed, published work, testified before the US Senate and before legislatures across the US about the dangers of vaccines, including the COVID-19 gene mutating shots. Speaking of the pandemic, the Amish did NOT go into lockdown, they did NOT put on masks that breed bacteria and they certainly did NOT "vaccinate" for the Wuhan Lab Flu. They ignored every CDC mandate and protocol and Fauci propaganda, including the lethal clot injections (because they knew better than to get injected with millions of toxic, sticky spike proteins and graphite nanoparticles).

Guess what happened? The Amish had a 90x higher COVID survival rate than the rest of America (Front News: [Amish communities](#)

[rest of the US](#)). No one wants to talk about this except natural health advocates. If you post anything about it on social media, you will immediately be banned, blacklisted and labeled as "misinformation" or "disinformation".

Why is it so important to avoid vaccines like the plague? Look at all the crazy ingredients used in vaccines, like preservatives, emulsifiers, adjuvants, genetically modified bacteria, mutated viruses and sterility-causing chemicals. This is all listed openly. No human should ever have any of this injected into their blood and muscle tissue, bypassing the body's normal defenses, including the skin, lungs and digestive tract.

These toxic, sometimes fatal ingredients include mercury (high doses in the multi-dose flu shot), human blood (albumin from abortions), deadly pig viruses called circovirus (in Rotateq Rotavirus jabs), eagle blood, dog blood, infected green monkey kidney cells, sucralose, monosodium glutamate (MSG), cow's blood, chicken's blood, eggs, dairy, antibiotics, peanut oil (yes, residue is left behind, hence all the deadly peanut allergies), latex (from the stoppers on the needles and vials the needles pass through), aluminum and more much more.

Sports reporter Bob Rathvun has convulsions on TV; and other videos of collapse, or sudden death, from Puerto Rico, Qatar, Singapore, South Korea and Ecuador, with FIVE from India
